DETAILED ACTION

Claims 1-18 are pending in the application.

Election/Restrictions

- 1. This application contains claims directed to the following patentably distinct species of zvegf3 antagonists: (Currently, claims 1-18 are generic)
 - i) Anti-zvegf3 antibodies
 - ii) Mitogenically inactive receptor-binding zvegf3 variant polypeptides
 - iii) Inhibitory polynucleotides

Furthermore, the above species of inhibitory polynucleotides encompasses the following patentably distinct species:

- a) antisense polynucleotides
- b) Ribozyme-encoding polynucleotides
- c) External guide sequence-encoding polynucleotides

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
